REMARKS: 25X1D

Photography of [REDACTED] shows, in addition to the 16 sites identified in ODE 8005 (Figure 1, items 1-16), the presence of a hexagon-type surface-to-air missile (SAM) site and a SAM support facility, under construction, located south of Saratov, USSR, and a SAM support facility located northeast of Kuybyshev, USSR. 25X1A

The SAM site at Saratov is located 11.5 nm south of the city at 51°19'N/46°00'E (Figure 1, item 17). Construction of both the operational and support areas appears complete. The operational area contains guidance revetments, six launch revetments, three drive-through missile hold revetments, and a vehicle park with five utility-type vehicles. No missiles, launchers, or guidance equipment have been identified at the site. The support area contains a large administration-type building, three barracks, and numerous smaller structures. [REDACTED] 25X1A

The SAM support facility which is in late stages of construction near Saratov is located 8.6 nm southeast of the city at 51°24'N/46°09'E (Figure 1, item C). It contains similar structures and is approximately the same size as the missile support facility near the Lenin Hydroelectric Station and Dam

(Figure 1, item A) 1/. This facility contains a drive-through building under construction, one large and two small revetted buildings, a small revetted storage area, and five small buildings. It does not contain any operational-type equipment.

The SAM support facility near Kuybyshev is located 8.5 nm northeast of the city at 53°17'N/50°17'E (Figure 1, item B). It contains structures similar to those at the Saratov SAM support facility, but it is much larger in area. This facility contains 23 canvas-covered missiles on transporters, a large drive-through building, one large and two small revetted buildings, a small revetted storage area, and numerous other buildings and vehicles.
